REMARKS/ARGUMENTS

1. Rejection of claims 1-3, 7-9, and 14 under 35 U.S.C. 103(a):

Claims 1-3, 7-9, and 14 are rejected under 35 U.S.C. 103(a) as being
unpatentable over Yanagida et al. (US 5,775,918, Yanagida hereinafter) in view of
5 DesForges et al. (US 5,085,587, DesForges hereinafter).

Response:

Claim 1 has been amended to distinguish from the cited prior art. Claim 1 now
contains the limitation of "not printing data onto the document with the printer when
10 the document already has the printing sign". This amendment is supported in
paragraph [0034] of the instant application, and no new matter has been added.

The printing method of the present invention checks uses a sensor located on a
printer to see if a document contains a printing sign. When a document that already
15 has the printing sign is inserted into the printer, the printer does not print data onto
the printer, and the document is ejected. On the other hand, when a document that
does not have the printing sign is inserted into the printer, the printer prints data onto
the document and then prints the printing sign onto the document.

20 Neither Yanagida nor DesForges teach "not printing data onto the document
with the printer when the document already has the printing sign", as is claimed in
the currently amended claim 1. Although Yanagida and DesForges teach marking
incorrect answers when a correct answer is not present, neither teach detecting the
presence of a printing sign, and not printing data onto the document with the printer
25 when the document already has the printing sign. Therefore, claim 1 is patentably
distinguished from the cited prior art.

Claims 2-14 are dependent on claim 1, and should be allowed if claim 1 is allowed. Reconsideration of claims 1-14 is respectfully requested.

5 Applicant respectfully requests that a timely Notice of Allowance be issued in this case.

Sincerely yours,
